INTRODUCTION	XI
--------------------	----

PART I

THE RENEWABLE ENERGY REFORM IN THE EU

THE ROLE OF RENEWABLE ENERGY WITHIN THE EU

MARILÙ MARLETTA

1. Introduction	3
2. Characteristics of renewable energy	7
3. The integration of renewable energy in the internal market of the EU. The present and future of European legislation on renewable energies	15
3.1. The legal basis of the European Union's jurisdiction in this area and the limited harmonization in the renewable energy sector	15
3.2. The obligations of the Member States to produce energy from renewable sources	21
3.3. Support schemes and their interference with the principles of competition and the internal market	24
3.4. Protecting investments	34
3.5. European governance of renewable energy	35
3.6. The integration of RES into the electrical energy system	38
4. Conclusions	40

THE GOVERNANCE OF RENEWABLE ENERGY. THE RENEWABLES DIRECTIVE FOR THE PERIOD AFTER 2020

LAURA AMMANNATI

1. Setting the scene	43
----------------------------	----

2.	The state of the art: renewable energies in the context of the Winter Package	50
2.1.	The goal: the transition towards a low carbon economy	50
2.2.	Tools to achieve the EU target	52
2.3.	Tools to ensure energy security	56
3.	Shaping a governance model	61
4.	Some final remarks	67

PART II

THE EUROPEAN RENEWABLE ENERGY POLICY AND INTERNATIONAL LAW

TRADE REDEMPTION: HOW TRADE AGREEMENTS CAN HELP DECARBONIZE THE ECONOMY

RAFAEL LEAL-ARCAS

1.	Introduction	77
2.	Setting the scene	81
3.	The challenge of mitigating climate change and achieving sustainable energy	89
4.	State of the art	97
5.	Making greater use of the trading system	100
6.	Finding synergistic links between the international trading system and the climate change regime	105
7.	Foster sectoral approaches such as aviation and shipping	113
8.	Forum for action: Exploring the club-option and beyond	113
9.	Outlook	124

PART III

THE INTERNAL MARKET AND RENEWABLE ENERGY INCENTIVES

RENEWABLES, INVESTMENTS, AND STATE AIDS: EXPLORING THE LEGAL SIDE OF POLYCENTRICITY

GIUSEPPE BELLANTUONO

1.	Introduction: managing the interplay among legal regimes	129
----	--	-----

2.	The RES investment problem.....	132
3.	RES investments and State aid law.....	139
4.	Is there a conflict between EU law and international investment law?.....	145
5.	Polycentric solutions for RES investments.....	156
6.	Conclusions.....	165

INCENTIVES FOR RENEWABLE ENERGY: THE SPANISH CASE

IÑIGO DEL GUAYO

1.	Spanish Energy Policy and Renewable Energies.....	167
2.	The Electricity Tariff Deficit (1998-2013).....	169
3.	Renewable Energy Sources.....	171
3.1.	The relevance of renewable Energy in Spain..	171
3.2.	Distribution of powers between Autonomous Communities and central government in the field of energy and, in particular, renewable energies.....	172
3.3.	Licensing.....	179
3.4.	Guarantee of origin and green certificates.....	179
4.	National Support To Renewable Energies.....	180
5.	The Progressive Reduction Of The Support Scheme in the period 2008 – 2013.....	181
6.	National and International Legal Disputes Over The Modification Of National Support.....	183
7.	The New Support Scheme Of The 2013 Electricity Sector Act.....	185
8.	Towards A Support Scheme Compatible With Free Competition In A European Union Context.....	188
9.	Conclusion. An Evaluation Of The Outcome Of Legal Disputes.....	189

PART IV

THE IMPACT OF RENEWABLES ON AGRICULTURE

**AGRICULTURE AND RENEWABLE ENERGY:
A DIFFERENT BUSINESS MODEL**

SONIA CARMIGNANI

1.	Climate change, renewable energy and agriculture...	195
2.	A new model of agricultural business.....	201

- | | | |
|----|--|-----|
| 3. | The reasons for preserving the specific characteristics of the agriculture | 205 |
|----|--|-----|

**RENEWABLES IN THE AGRICULTURAL SYSTEM BETWEEN
RURAL DEVELOPMENT, FOOD SECURITY
AND ENVIRONMENT**

NICOLA LUCIFERO

- | | | |
|----|---|-----|
| 1. | Sustainable development, energy security and food security..... | 209 |
| 2. | Renewable sources in agriculture between development and related interests..... | 212 |
| 3. | Renewable sources in agriculture and the protection of the agricultural landscape..... | 218 |
| 4. | Sustainable use of energy and improvement of energy efficiency in the agri-food sector..... | 223 |

PART V

NEW PROSPECTS AND CHALLENGES

**CONTROL OF ENERGY PRICES BY CUSTOMER
SMART METERING**

INDRA SPIECKER

- | | | |
|-------|-------|-----|
| | | 229 |
|-------|-------|-----|

**SELF-GENERATION AND ENERGY COMMUNITIES:
ISSUES AND PERSPECTIVES**

PIER MARCO ROSA SALVA

- | | | |
|----|---|-----|
| 1. | Premise: the challenge of self-generation..... | 257 |
| 2. | Self-generation in the development of traditional energy systems. | 259 |
| 3. | Promoting self-generation in Europe: the EU «winter package»..... | 266 |
| 4. | Self-generation in Italy. | 274 |
| 5. | Persisting limitations and possible legal basis for immediate reforms. | 278 |
| 6. | Conclusions: a future made of energy autonomous communities? | 285 |

SELF-GENERATION: A EUROPEAN PERSPECTIVE

DAVIDE MURRU

1.	Introduction.....	287
2.	The European framework	288
2.1.	The consumers' role according to the EU.....	289
3.	The Italian framework	291
3.1.	Closed Distribution Systems (CDSs).....	292
3.1.1.	General costs for CDSs – Before the Milleproroghe Decree 2017.....	293
3.1.2.	General costs for CDSs – After the 2017 Milleproroghe Decree	294
3.2.	Simple Production - Consumption Systems (SPCSs).....	295
3.2.1.	– Past and present SPCSs.....	296
3.2.2.	User Efficiency Systems (SEUs).....	297
3.2.3.	Existing Systems Equivalent to User Efficiency Systems (SESEUs).....	298
3.2.4.	ASAPs and AEs.....	299
3.2.5.	General System Costs for SPCSs – Before the 2017 Milleproroghe Decree	299
3.2.6.	General System Costs for SSPCs – After the 2017 Milleproroghe Decree	300
3.3.	The GSE's qualification.....	301
3.4.	Net Metering Service.....	302
4.	Conclusions.....	303

BEYOND PROSUMERS: SOME (PRELIMINARY)
CONSIDERATIONS ON BLOCKCHAIN AND RENEWABLE
ENERGY SOURCES IN EUROPE

MARINA PETRI

1.	Introductory remarks.....	305
2.	Blockchain technology: cui prodest?.....	306
3.	Blockchain technology and the energy sector	312
4.	Conclusions.....	316
