<i>Abstract</i>	XVII
<i>Introduction</i>	XIX

CHAPTER 1

REGULATORY CHALLENGES IN THE DIGITAL ERA: THE EMERGENCE OF REGULATORY SANDBOXES AS A STRATEGIC TOOL

1. Introduction: Regulating digital innovation and the rise of experimental approaches	2
1.1. The challenge of digital regulation	2
1.2. Principles of experimental regulation	5
1.3. Regulatory experimentation tools	7
2. Regulatory sandboxes: Definition and functioning....	9
2.1. The definition gap	9
2.2. Regulatory sandboxes: Theoretical definition and key elements	11
2.3. Clarifying the regulatory sandbox concept through practical use cases	17
2.3.1. Fintech	18
2.3.2. Data protection	23
2.3.3. Artificial Intelligence	26
2.4. Regulatory sandboxes in transition: A preview of their institutionalisation at EU level	34
3. Positioning regulatory sandboxes within EU digital ecosystem	36
3.1. The evolution of the concept “digital ecosystem”	37
3.2. The European digital ecosystem and its main components	39
3.3. How regulatory sandboxes integrate into Europe’s digital innovation ecosystem	44

CHAPTER 2**THE EU'S REGULATORY APPROACH TO SANDBOXING:
LEGAL DESIGN AND PILOT IMPLEMENTATION**

1.	Introduction: Understanding the EU's strategic turn to regulatory sandboxes	48
2.	Comparing key EU strategic regulations: The AI Act, the Cyber Resilience Act and the Interoperable Europe Act.....	53
2.1.	Artificial Intelligence Act.....	54
2.1.1.	Main elements of the Regulation	54
2.1.2.	"AI regulatory sandboxes" under the AI Act.....	58
2.1.3.	The draft implementing act on the establishment and operation of AI regulatory sandboxes	73
2.2.	Cyber Resilience Act.....	78
2.2.1.	Main elements of the Regulation	78
2.2.2.	"Cyber resilience regulatory sandboxes" under the CRA	81
2.2.3.	Interplay between CRA and AI Act...	84
2.3.	Interoperable Europe Act.....	87
2.3.1.	Main elements of the Regulation	87
2.3.2.	"Interoperability regulatory sandboxes" under the IEA.....	88
2.3.3.	Interplay between IEA and AI Act....	92
2.3.4.	The implementing act on the establishment and operation of interoperability sandboxes	94
3.	European' AI-Focused Sandboxes and the EUSAiR Project: Towards EU-level synergies.....	98
3.1.	European sandbox initiatives	99
3.1.1.	Spanish AI Regulatory Sandbox	99
3.1.2.	European Blockchain Regulatory Sandbox	103
3.1.3.	Dutch operational proposal for an AI regulatory sandbox	106
3.2.	The need for a structured European sandbox framework: The EUSAiR Project.....	110
3.2.1.	Project overview.....	110
3.2.2.	Objectives and expected results.....	112
3.2.3.	Main challenges.....	113
3.2.4.	Timeline and initial reports	115
4.	From hypothesis to thesis: The need for a holistic and applied research methodology	119

CHAPTER 3

**BRIDGING THEORY AND PRACTICE: QUALITATIVE
EVIDENCE FROM KEY STAKEHOLDERS ON THE
CHALLENGES, STRENGTHS AND FUTURE OF EU
REGULATORY SANDBOXES**

1. Introduction: Interview methodology and scientific value.....	123
1.1. Rationale and objectives of the interviews.....	125
1.2. Interviewees and questionnaires	127
1.2.1. Introductory framework and common elements.....	127
1.2.2. Questionnaire structure: Specific to category	129
1.2.2.1. Practitioners.....	129
1.2.2.2. Participants.....	131
1.2.2.3. Institutional actors.....	133
1.3. Analysis of responses: Interpretation and triangulation of the collected data	133
2. Benefits and strengths of regulatory sandboxes: The empirical evidence and strategic relevance of the tool	135
2.1. Flexible tool serving the common good.....	135
2.2. Qualified entry point to the EU Digital Ecosystem.....	138
2.3. Free qualified legal support: Reducing costs and improving regulatory understanding for SMEs and start-ups.....	140
2.4. Regulatory antenna: Opportunities and risks of using the sandbox to identify new regulatory requirements.....	142
2.5. Strategic value of bidirectional regulatory learning.....	147
2.6. “Reputational value” of participating in the experimental trial.....	151
2.7. Tool for regulatory simplification and innovation	154
3. Limits and key issues of regulatory sandboxes: Critical challenges to be addressed to ensure effectiveness.....	156
3.1. AI–cybersecurity: Recognised interdependence, yet limited experimentation	157
3.2. Limited resources: A shared challenge for regulatory authorities and sandbox participants	162
3.3. Innovation in regulatory experimentation: The	

	importance of clear definitions and cultural readiness.....	166
3.4.	Strategic role of communication throughout the entire experimentation cycle.....	169
3.5.	Coordination gaps as a critical risk: Within and across sandboxes coordination.....	176
3.6.	(Some) Additional operational barriers: Limits to legal exemptions, lack of testing environments, and cautious attitude of the authorities.....	180
4.	Interviewees' vision: Institutional models and expectations for the future EU sandbox framework..	182
4.1.	Towards an effective regulatory sandbox governance model: Sectoral specialisation vs. multi-authority approach.....	184
4.2.	Future perspectives and governance challenges of the EU sandbox framework.....	187

CHAPTER 4

FROM EVIDENCE TO ACTION: OPERATIONAL RECOMMENDATIONS AND PROPOSAL FOR A MULTI-AUTHORITY NATIONAL REGULATORY SANDBOX SCALABLE MODEL

1.	Introduction: From research findings to the operational proposal.....	191
2.	Operational recommendations: From empirical evidence to practical solutions for regulatory sandbox implementation	192
3.	Bridging evidence and vision: Three key takeaways for a scalable European regulatory sandbox model...	201
3.1.	Regulatory and structural flexibility: Adapting the “intensity” of sandboxing to case-specific needs and enabling it through other innovation tools	202
3.2.	A paradigm shift: From a legal obligation to a strategic “regulatory investment”.....	207
3.3.	Towards an integrated multi-authority sandbox model for AI, cybersecurity, and data protection in the governance of digital products.....	210
4.	From hypothesis to design: An operational proposal for a multi-authority regulatory sandbox.....	221
4.1	Operational framework of the proposal.....	222

4.1.1.	Governance model: Establishing a multi-authority steering committee for “permanent” authorities	222
4.1.2.	Coordination with relevant “non-permanent” authorities	228
4.1.3.	Coordination with pre-existing regulatory sandboxes and joint calls for applications	229
4.1.4.	Allocated resources	230
4.1.5.	Infrastructure	232
4.1.6.	Integration into the EU digital ecosystem	233
4.1.7.	Strategic enabling factors complementing experimentation	234
4.1.8.	Costs of experimentation	236
4.1.9.	Additional operational measures across sandbox phases	237
4.2.	National implementation of the operational proposal: The Italian case study	240
4.2.1.	Regulatory framework: Italian Law No. 132/2025 on AI	240
4.2.2.	An institutional framework favourable to the model	241
4.2.3.	Concluding remarks	245
	<i>Conclusions</i>	247
	ANNEX I – List of interviewees	255
	ANNEX II – Questionnaires	258
	ANNEX III – Findings and corresponding recommendations	267
	<i>Bibliography</i>	271
